REMARKS

Enclosed is a copy of a Sequence Listing in paper and computer readable form as required by 37 C.F.R. § 1.821(c) and (e).

The specification has been amended to include appropriate sequence identifiers for the disclosed sequences. Support for the Sequence Listing and the amendment to the specification can be found in the original specification at page 1, lines 25-28.

The content of the paper and computer readable copies are the same and no new matter has been added.

In view of the foregoing, it is believed that the application is now in compliance with the Sequence Rules under 37 C.F.R. § 1.821 - 1.825.

Attached are new Figures 1-8 as separate drawings as required in the Notice. These figures correspond to the figures embedded in the specification at pages 11, 12, 18, 19, 21 and 23. Therefore no new matter has been added by the new figures.

The specification has been amended to conform with the general outline of patent specifications by including appropriate section headings, including a Brief Description of the Drawings.

An abstract has also been added as supported by the original disclosure at page 1, lines 17-22.

Claim 1 has been amended to include appropriate sequence identifiers for the disclosed amino acid sequences.

Claim 1 was also amended to provide proper antecedent support for the peptides of SEQ ID NOS: 1-2.

Claims 1-8 have also been amended to include "A" or "The" at the beginning of the claim to be consistent with standard U.S. claim terminology.

Therefore, no new matter has been added by this amendment.
